

Jig A

LAYOUTS	PCBS	HOLES
4	208	13

All 13 holes in jig A. Each build uses some of them.

How to use it

1. Find your PCB in this pack. The page it is on shows which holes that layout uses.
2. Sit the jig on the enclosure so the walls wrap the sides, and hold it down.
3. Centre punch through those holes, and only those.
4. Take the jig off and drill each mark, to suit the hardware you are fitting.

Every hole in the jig is the same size, because the jig marks where to drill, not how big. It is not a drill guide: punch through it, then take it off and drill.

What is inside

A build that is not listed here needs jig B.

1-Knob (Type 1)	7	PCBs
2-Knob (Type 1)	29	PCBs
3-Knob (Type 1)	104	PCBs
4-Knob (Type 1)	68	PCBs

125B 1-Knob (Type 1)

Jig A · punch through these 6 holes, leave the rest

TYPICAL SIZES

1	12mm	Footswitch
2	9.5mm	Jack
1	8mm	DC Jack
1	7mm	Pot
1	6.35mm	LED

A guide, not a specification. Hardware varies, so measure what you are fitting and drill to that.
